Subject index to Volume 9

Alginate
gelation, study by ultrasonic spectroscopy 195
Amylose
gelation, study by ultrasonic spectroscopy 195

Bacterial enzymes
use in pectin extraction from pumpkin/sugar beet 43

Carrageenan
Eucheuma cottonii, effects of isolation procedures on molecular composition physical properties 281
κ-Carrageenan
mixed systems—xanthan gum, effects of mesquite seed gum 251
Cholesterol
extraction from dried egg yolk using polysorbate 80 205
Cigarettes
production, pectin extracts characteristics/application 97
Cocoyam starch
paste/gel rheology 69
physico-chemical properties 77
β-Conglycinin
heat-induced conformational changes 83
Corn syrup
effect on gellan–gelatin mixed gels physical properties 211

Dietary fibres
effects on colonic functions 9

EC
food regulations 257
Egg yolk
dried, cholesterol extraction from using polysorbate 80 205
sucrose stearate, light mayonnaise containing, flow behaviour, stability 111
Eucheuma cottonii
carrageenan, effects of isolation procedures on molecular composition physical properties 281

Fructose
mixtures—high-methoxyl pectin/sodium alginate, gelation, softening 229

Gelatin
mixed gels—gellan, sucrose/corn syrup effect on physical properties 211
Gellan
dilute aqueous solutions, properties 189
gum, fluid gels 265
mixed gels—gelatin, sucrose/corn syrup effect on physical properties 211
Glass
transitions, effects on product stability 307
Globular proteins
gels, fracture properties/microstructure determinants 237
(1→3,1→4)-β-D-Glucan
composition, molecular weight, rheology 1
Ground beef patties
low-fat with added whey protein concentrate, ultrastructure 291
Gum arabic
functionality 123
Gummiferae
relationships with Vulgares, natural gums classification 17

Idli
effects of xanthan on texture 141

Khan
flour, weak gel 165

Light mayonnaise
containing egg yolk/sucrose stearate emulsifiers, flow behaviour, stability 111

Lupin seeds
proteins, purification/concentration 103

Mesquite seed
gum, effects on κ-carrageenan–xanthan gum mixed systems 251
Methylhydroxypropylcellulose
aqueous solution, gelation mechanism 173
Milk
proteins, structure, droplet surface 91
Mixed protein films
surface shear viscosity, protein–surfactant interactions 35
Multicomponent gels
physico-chemical aspects, processed foods 317

Natural gums
classification, Vulgares relationships with Gummiferae 17
classification by amino acid cluster analysis 151
Non-starch polysaccharides
whole grain rye flour, rheology of 133

Oat gum
composition, molecular weight, rheology 1

Pectin
bacterial enzymes use in extraction from pumpkin/sugar beet 43
extracts—characteristics.application, cigarettes production 97
from pumpkin/sugar beet—composition/properties 147
high-methoxyl, mixtures—sodium alginate/fructose, gelation, softening 229
Polysaccharides
engineered, rheology 225
Polysorbate 80
cholesterol extraction from dried egg yolk using 205
Processed foods
multicomponent gels, physico-chemical aspects 317
Pumpkin
bacterial enzymes use in pectin extraction from 43
pectin composition/properties 147

Rye
whole grain flour, rheology of non-starch polysaccharides 133

Salad dressing
xanthan stabilization of 333
Scanning probe microscopes
current use, potential 273
Sodium alginate
mixtures—high-methoxyl pectin/fructose, gelation, softening 229
Sucrose
effect on gellan–gelatin mixed gels physical properties 211
freeze-concentrated solutions, stress-relaxation
behaviour—influence of stabilizers/freezing rate 181
Sucrose stearate
egg yolk, light mayonnaise containing, flow behaviour, stability 111
Sugar beet
bacterial enzymes use in pectin extraction from 43
pectin composition/properties 147

Vulgares
relationships with Gummiferae, natural gums classification 17

Weak gel
khan flour properties 165
Whey protein
dielectric properties indicate polymer mobility changes 343
isolate gels, anion-induced matrix transformations 57
isolate gels, effects of anions on 47
low-fat ground beef patties with added concentrate, ultrastructure 291

Xanthan
effects of on idli texture 141
gum, mixed systems—κ-carrageenan, effects of mesquite seed gum 251
stabilization of salad dressing 333
